Curriculum development aspects

Kriviy Rih National University declared development and implementation of 7 courses (3 new/4 updated). These courses will be included in 2 curricula - 151- Cyber-physical systems (Master Program) and 275 - Transportation technologies (Bachelor Program)

№	COURSES	THE NAMES OF RESPONSIBLE
New courses		
1.	Smart manufacturing based on cyber-physical systems	Sergii Ruban PhD, Associate prof. of the Automation, Computer Science and Technology Department
2.	Machine Learning for Cyber Physical Systems and Industry 4.0	Vitaliy Tron PhD, Associate prof. of the Automation, Computer Science and Technology Department
3.	Transportation Cyber-Physical Systems	Volodymyr Sistuk PhD, Dean of Transport Faculty, Associate prof. of the Dep. of Automobile Transport
Updated courses		
1.	Open Pit Intelligent Transportation System	Mykola Stupnik Rector of KNU, Professor, Doctor of Engineering Science Yurii Monastyrskyi Professor, Doctor of Engineering Science, Head of the Department of Automobile Transport
2.	Modern Information Technologies in Transport	Volodymyr Sistuk PhD, Dean of Transport Faculty, Associate prof. of the Dep. of Automobile Transport
3.	Adaptive and Robust Systems	Natalia Morkun Professor, Doctor of Sciences (Engineering), Head of the Automation, Computer Science and Technology Department
4.	Project Approach to the Designing of Cyber-Physical Systems	Iryna Zavsiehdashnia PhD, Associate prof. of the Automation, Computer Science and Technology Department

In KNU we use Google Classroom platform for studying processes

VISSIM car-following model adjustment Чернетка

There is a brief description of Wiedemann 74/99 car-following model adjustment which is used as a basic algorithm of driver behaviour simulation in VISSIM software. It will help you to perform the next exercise

Description of the course

The course was updated corresponding to Erasmus + KA2 "CybPhys" project .
