# [CybPhys] WP2 (T2.2) Teaching staff training on curricula topics. Students training on curricula topics

## Planning for the Teaching staff training hosted by UCY (priority)

Dr. Irina Ciornei  
University of Cyprus

Imperial College  
London

12/01/2021

Funded by:

# Outline:

- **Scope and requirements:**
  - Approval for the indicative period
- **Options for hosting the training school**
- **Activities rollout**

## Scope and requirements:

- one of the three training activities for academic/teaching staff
- Requirements:
  - duration: one week
  - format: four persons from each PC university
  - curricula topics (complementary to the other two training activities)
  - new ICT tools
  - advanced educational technologies.

**Place: (as per Proposal) *the training will take place at the **UCY premises.*****

*To be changed to “the training will be hosted by UCY in a format agreed by partners respecting the country guidelines for the epidemiological situation.”*

# Options for hosting the training school

Proposed period (one week during **July-August 2021**)

**Reason for this choice:** ideally this training shall take place before the new academic year starts, such that the academics participating in this training got “the best practice knowledge transfer” from the EU partners before they start teaching the *improved* curricula.

- **Option A** (probable): **full on-line**.
- Option B (**highly probable**): **hybrid format** (some participants to be physically present on premises of the UCY, others on-line).
- **Option C** (ideal case): **physical presence**.
- Platforms to be used in options A&B:
  - **ZOOM or MS TEAMS** or (depending on development status) we may use the Sharing Modelling and Simulation Environment platform (**SMSE**) developed under CybPhys.

# Activities rollout

## Proposed deadlines for all options:

- **Selection of the tutors/trainers** for the training school -> **deadline End. of March 2021.**  
Expertise to be covered on all three vectors of knowledge:
  - curricula topics (complementary topics with the the other two training schools)
  - new ICT tools
  - advanced educational technologies.
- **Registration of the trainees** (four members of each PC university) -> **deadline end of March 2021**
- **Provision of the syllabus** for the training school -> **deadline end of June 2021.**
- **Provision of all presentations** at least **one week before the lecture date** to be uploaded on the training portal.

## Activities and deadlines for options B and C:

- **Invitation letter** for participants needing **visa** for Cyprus (request for this invitation no later than beginning of **June 2021**). **Letter sample will be prepared in advance.**
- **Accommodation options and booking** (end of June 2021).

# Discussion

- **Propose topics (each EU partner?)**
  - Technical topics need to be aligned with the courses to be taught in the PCs universities
  - New ICT tools (could be a blend between what is already used and what we use in EU Universities)
  - Advanced educational technologies (need to be adapted to the most popular among the academics in the PCs universities)
- **Nominations of the lecturers for the training school (?)**
  - This decision shall be in coordination with the hosting leaders for the other two training schools.
